METFORMIN RECALL

Cnn.com headline:

“A diabetes drug has been recalled because it contains high levels of cancer-causing agent.”

Our response to concerned patients –

We have been made aware that the doses of Metformin 500mg-ER and 750mg-ER tablets* from certain companies have just been withdrawn by the FDA due to contaminants.

Please contact your pharmacy first to clarify whether or not the medications you have are the among the lots that have been withdrawn by the FDA and have your pharmacist contact us directly for any substitutions that may be necessary.

*** NOT THE PLAIN VERSION**
